1. The Burnaby Mountain Gondola Transit Project is being proposed to improve reliability and travel times to and from Burnaby Mountain and reduce the greenhouse gas emissions currently produced by buses that service the area.

   To what extent do you agree that this would be a good solution to solving some of the challenges of travelling to and from Burnaby Mountain?

   1 = Strongly Disagree  2 = Disagree  3 = Neutral  4 = Agree  5 = Strongly Agree

   Please provide comments to explain your response: ____________________________________________

2. Tower location options

   The gondola would be supported by five towers. There may be an option to select preferred tower locations. Which would you prefer?

   ___ On or close to existing roadways         ___ In the forested area, or close to it

3. Visual impact of towers

   The visual impacts of towers could be minimized by landscaping or paint treatments. Minimizing the visual impact of these towers is:

   ___ Very important to me         ___ Somewhat important to me         ___ Not important to me
4. Integration with the transit system

If the gondola project proceeds, the bus service will be restructured to accommodate new travel patterns. What factors should we be considering when planning these changes?

5. Other topics of interest

No decision has been made about whether this project will proceed. If it does proceed, more consultation will take place on specific features of design and construction. What topics are of interest to you that you would like to see included in the next round of consultation should the project proceed?
