## Proposed transit changes in North Delta and Newton

BC Transit, in consultation with the Districts of Surrey and Delta, is proposing major changes to North Delta and Newton bus routes, beginning January, 1987. The changes are intended to integrate the area's bus routes with SkyTrain and to utilize the new Annacis Bridge.

Specific changes include the rerouting of the #316 service from Scottsdale Mall to the 22nd Street SkyTrain Station in New Westminster. Other changes include the introduction of a number of peak period express routes that will link 112th Street, 116th Street and 72nd Avenue directly with SkyTrain. Improved feeder bus service is also proposed for Sunshine Hills and West Newton. In addition, the #321 route, connecting Whalley and White Rock Centre, will operate via the Newton town centre.

In order to provide area residents with an opportunity to view and comment on the proposed route plans, BC Transit will be holding a series of Public Open Houses in Newton and North Delta. Residents are invited to drop in to review the plans at the Newton Library, Scottsdale Mall and the George Mackie Library. While there they can also meet with members of BC Transit's planning staff who will be happy to answer questions and receive comments on the proposed plan.

The Public Open House sessions are scheduled as follows:
