

TransLink Management Report

Kevin Quinn, TransLink CEO
April 22, 2022

Transit for the Planet

Transport 2050: 10-Year Priorities

Through May 4, we're asking for feedback on the **2022 Investment Plan** and **Transport 2050: 10-Year Priorities**.

Discussion Guide for Consultation on:

1. 2022 Investment Plan; and
2. Transport 2050 10-Year Priorities

Consultation Period: April 20 – May 4, 2022

A map of Metro Vancouver showing transit corridors. The map features a network of blue lines representing proposed or planned Bus Rapid Transit corridors, and a network of black lines representing existing transit routes. Red shaded areas indicate urban centers or high-density areas. The map is overlaid on a light gray background showing the region's topography and water bodies.

Up to nine Bus Rapid
Transit corridors across
Metro Vancouver

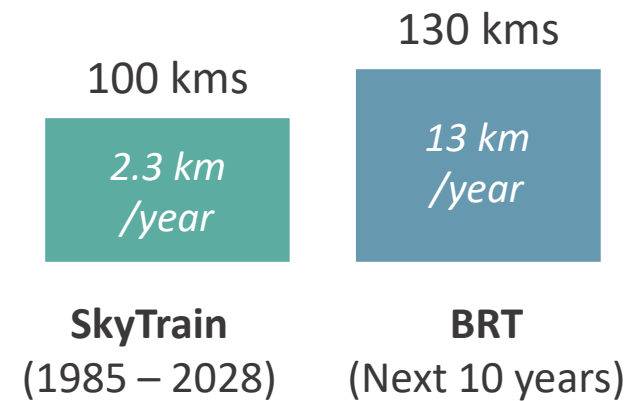

Why BRT?

Cost-Effectiveness + Deployment Speed

Cost per kilometre (million)

Kilometres built over time period

This is an opportunity to find new revenue sources
to fund transit initiatives in the future

Electric BRT, Europe

Let's work together.

A nighttime photograph of a city street. In the foreground, there are long, horizontal light trails from cars, primarily in shades of red and orange, indicating a long exposure. The middle ground features a modern transit station with a glass and metal facade, labeled "Main Street-Science World Station". To the left, a tall building has a red "Vancity" sign on its top. The sky is dark, and a bright street lamp creates a starburst effect. The overall scene is illuminated by city lights and the station's interior lights.

Thank you
